

## USER GUIDE

1. Press and hold the On/Off button (top right-hand corner) for 2 seconds or until the phone turns on.
2. Wait while the phone starts up and plays its tune.
3. Use the Top-left button under "Tube 2 Londo..." to select the London Tube Guide.
4. Wait while the application loads and you will see a map of London showing the Tube stations.
5. You can use the joystick to move around the map (and the maps scrolls).
6. You can select a location by placing the cursor on or near the Tube station you want.
7. Use the Top-left button under "Options" to decide what you want to do.
8. If your eyesight is as bad as mine you will want to select "Options" and use the "zoom" feature.
9. The rest of the phone is really standard stuff and I will not presume to tell you how to use it. Any problems just call our help line.
